Profile

Full-stack developer building scalable, user-focused web applications using modern JavaScript technologies. Experienced in developing end-to-end systems with PostgreSQL, Prisma, and RESTful APIs, including authentication and real-time features. Strong focus on performance, clean architecture, and delivering reliable, production-ready applications.

Tech Stack

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, TailwindCSS

Backend: Node.js, Express, PostgreSQL, Prisma, Supabase MongoDB

Tools: Git, GitHub, REST APIs, Redis, Vercel, Railway

Projects

PowerTrack - Electricity Usage Tracker (Full-Stack)

- Built a full-stack application to track electricity usage, log consumption, and predict how long units will last using data-driven insights.
